Price list TH-trailers 2024

Vlemmix detachable TH-trailers

Vlemmix Detachable Tiny House trailers comprise a lightweight trailer with a chassis and a separate super-deck structure on which e.g. a tiny house, a mobile sales point, or a similar unit can be built. The key feature of this model is that using just a single trailer and several super-decks one can "load", transport, and "offload" as many built units as necessary without using any crane or other auxiliary machinery. Trailers and super-decks can be purchased separately. The detachable Tiny House trailers are available in the following dimensions:

Vlemmix TH Plateau trailers

Tiny House Plateau trailers have a platform whereby the surface of the platform is higher than the wheels and wheel arches, allowing one to use for construction the entire platform, unlike classical trailers.

Vlemmix detachable Tiny House trailers are available in the following dimensions:
