

Tension Measurement & Control Systems

Dover Flexo Electronics products are used in unwind, rewind, and intermediate applications for moving continuous material which undergoes an operation such as printing, coating, laminating, treating, metallizing, rewinding, unwinding, slitting, coating or other processes.

Brakes — Clutches — Couplings

Mayr power transmission provides optimum and tested quality: All products are rigorously tested on calibrated test stands and adjusted precisely to the requested values.

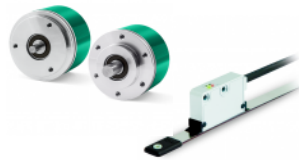

VOC Monitors — Area Monitors

Control Instruments manufactures gas detection systems, leaving your facility, employees, and environment safe and secure. Products are installed and used under the most demanding conditions.

Precision Leadscrews

Accuracies to 10 micro-inches per turn
25 micro-inches per inch

SMART ENCODERS & ACTUATORS

Lika develops and manufactures incremental and absolute, optical and magnetic, rotary and linear encoders.

Rotary Pivots & Bearings

Riverhawk provides industry-leading products Infinite Life, Frictionless Pivot Bearings and Custom Engineered Bearings

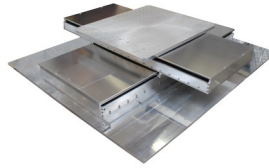

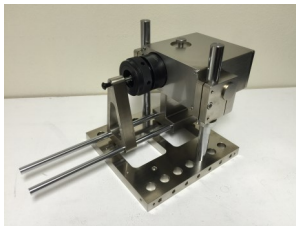

Rotary Pivots & Bearings

Riverhawk provides industry-leading products
Infinite Life, Frictionless Pivot Bearings and
Custom Engineered Bearings

Peak Servo Products

Peak Servo provides precision motion
controls, high performance PWM and
Linear Servo Amplifiers. Custom designs

Custom Engineered Mechanical Systems

XYZ Positioning Systems
Azimuth/Elevation
High Precision Leadscrews.
Motion Control Systems

SETCO

LINEAR DOVETAIL SLIDES

Heavy Duty Linear Dovetail and Linear Bearing
Slides. Both Manual and Motorized

FIBRO

ROTARY POSITIONING TABLES & SYSTEMS

Indexing and motorized rotary Systems. Multi Axis
Systems for Automated Systems and Machine Tool
Applications
