## Lasers Marking & Ablation Services

Our Co2 and Fiber Laser Systems are widely used for laser ablation. Although these lasers are used with different materials, they achieve laser ablation in the same way

We will provide reliable technical laser services for your products. Quality Laser Solutions has Co2 and Fiber lasers for a variety of application. We give our high and low volume customers low-cost solutions for their laser processing.

Quality Laser Solutions from Potter-GMH Technologies

---

### Acrylic Cutting & Engraving

Achieve flame-polished edges by laser cutting extruded acrylic and create frosty white graphics when laser engraving cast acrylic

### Barcode Laser Engraving

A Laser is the ideal choice for barcode engraving and etching

### UID Laser Marking

Unique Identification programs use lasers for identification and traceability of government inventories

**Our Laser Machines can cut wood, paper, plastic, fabric, foam, and much more with high precision and speed, giving clear advantage over other types of cutting technologies.**
