

A trusted referral partnership and additional revenue stream.

Xperience Referral Partnerships

Add value with employee benefits for your commercial clients and in turn gain access to their employees so you can help them with their home and auto needs.

Bring value to your commercial clients through their employees.

With an Xperience Referral Partnership you can **bring more value to your clients** while creating another revenue stream for your agency.

Your commercial clients have a trusted partner in you. But many also need a reliable source for employee benefits and health coverage. We partner with you to expand that trust to the benefits side of their business. Then, during the benefit enrollment, our counselors meet individually with each employee and refer them back to your capable hands for their individual home and auto needs.

It's a great way to expand your personal lines by helping your commercial clients with their employee health benefits.

In this competitive labor environment, business owners need every tool available to **attract**, **inspire** and keep great employees so they can **grow** their business. Together we can provide that value and create a true win-win for both agencies.

Employees referred back to you for their home and auto needs.

ATTRACT and INSPIRE your clients so you can GROW your business!
