

FEATURED EQUIPMENT

Auto Tubing Line

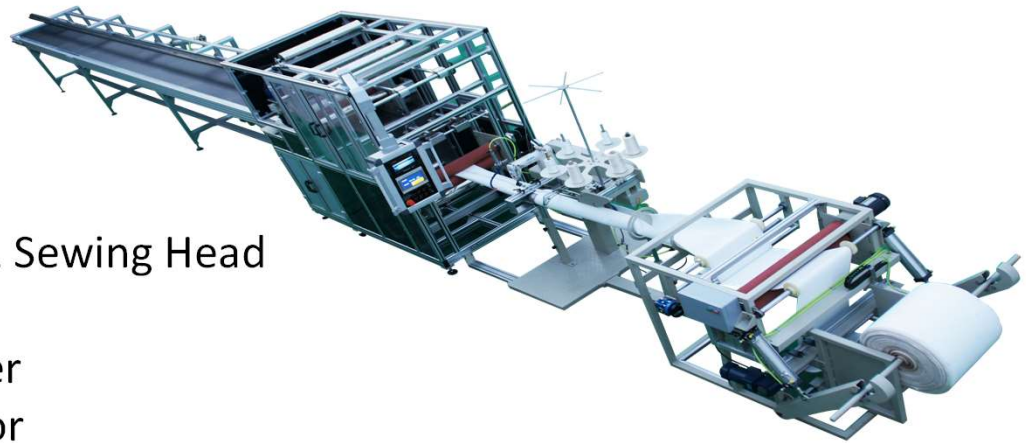

Auto Snap Band Line

Auto Liquid Filter Bag Line

AUTO TUBING LINE

- Juki MS-1261 Sewing Head
- PLC Control
- Needle Cooler
- Thread Sensor
- Customizable Conveyor Length
- International brand Parts
- Pneumatic Roll Loading
- Automatic Piece Counter
- Material Presence Sensor
- Printer
- Woven Material Folders
- Felt Material Folders

Available Options:

- All in One Sewing/Heat Weld Head
- French Fell Seaming
- Fiberglass (Woven) Forming Guide
- Auto Line Marking
- Seam Sealing
- Membrane Removal

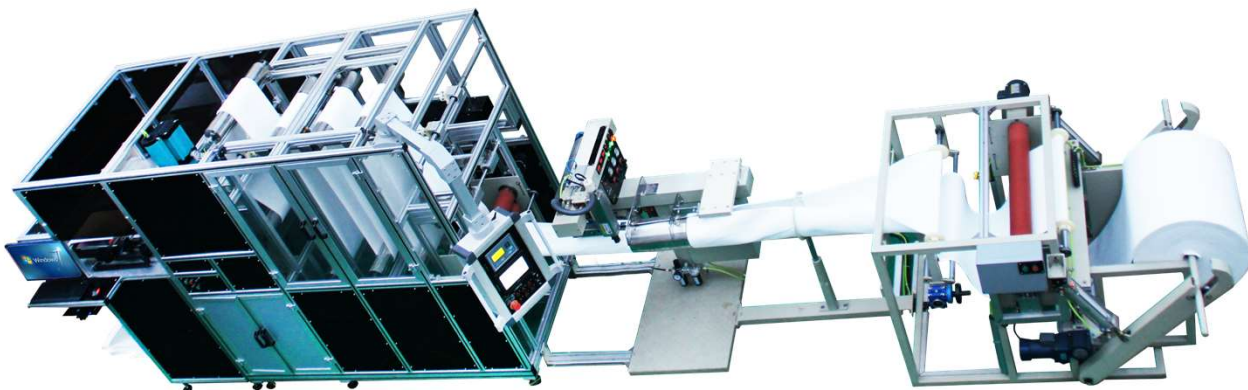

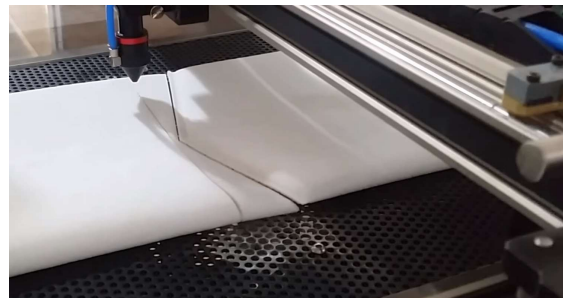

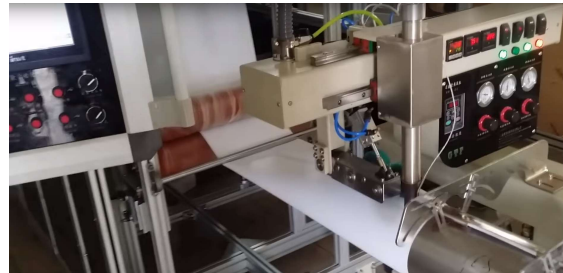

NIMBLETUBER

- Juki MS-1261 Sewing Head or
- Heat Seal Welding Head or
- Combo Sewing and Heat Seal
- 32' long x 57" wide
- Simple design
- Standard conveyor 13' or
- Custom conveyor length available
- Designed to fit in one 20' container for economical shipping

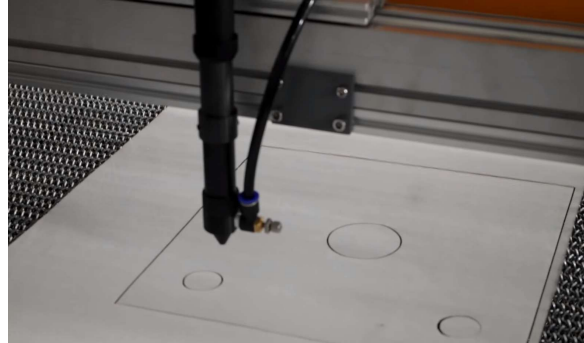

AUTO LIQUID FILTER TUBING LINE

- Heat welded or sewn seam
- Pneumatic Roll Loading
- Material Presence Sensor
- Automatic Piece Counter
- Tension Control
- Servo Motor Feeding System
- Laser Cutting or other type
- Ultrasonic Welding
- No Knives Needed

LASER CUTTING TABLE

- 150, 300, or 600W
- Cuts Any Shape or Size
- 2000 x 4200 mm
- 78.75" x 165.35"
- 0.2 – 12mm Thickness
- 0.008" - .047" Thickness
- International Brand Parts
- Computer Interface
- CAD Drawings Accepted

MATERIAL SLITTER

- Adjustable Tension Control
- Auto Roll Loading
- Backlit Inspection Area
- 6 Rotary Knives Included
- Hot knives available
- Additional Knives Available
- Width: 2.5m, 98.4"
- Custom Widths Available
- Max Roll Diam: 1.2m, 47.24"
- International Brand Parts

AUTOMATIC PLEATED FILTER LINE (STAR BAGS)

- Automatically Pleated
- Ultrasonic Welded pleats
- Huge Labor Savings
- Call for Moore Information

AUXILIARY EQUIPMENT

Tubing Sewing Head

- Juki MS-1261 Sewing Head
- Purchased Alone or
- Semi-Auto Tubing Line or
- Auto Tubing Line

Tubing Hot Air Welding Head

- Heat Welding Head
- Purchased Alone or
- Semi-Auto Tubing Line or
- Auto Tubing Line

Sewing & Welding All in One

- Juki MS-1261 Sewing Head plus
- Heat Welding All in One
- Rotates by push of a button
- Purchased Alone or
- Semi-Auto Tubing Line or
- Auto Tubing Line

AUXILIARY EQUIPMENT

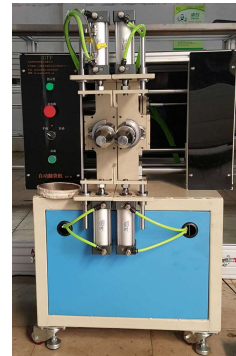

Filter Bag Folding Machine

- Fold Filter Bags Automatically
- Reduces Space Needed
- Reduces Ergonomic Stress

Auto Cuff Folding Machine

- Inserts Snap Band into Cuff
- Reduces Ergonomic Stress

Seam Sealing Machine

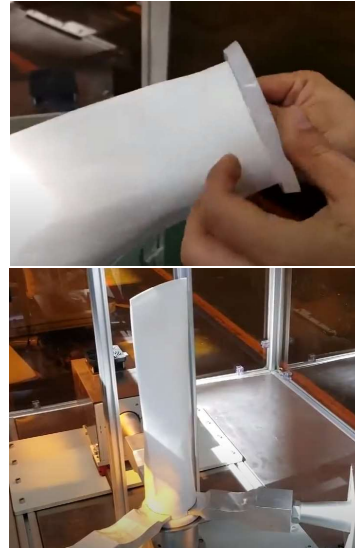

- Apply and Dry in one
- Applies High Temp Tape to Seam
- Available alone or
- Option with Auto Tubing Line

AUXILIARY EQUIPMENT

Liquid Filter Collar Welding

- Ultrasonic welding
- Welds collar to filter bag

Beaded Felt (Welt) Sewing

- Sews the edges of welt

Welt Slitter

- Mini slitter for welt
- High speed production

FOAM MACHINES

CNC FOAM GRINDER

- Multiple heads
- Accepts CAD drawings
- High speed line

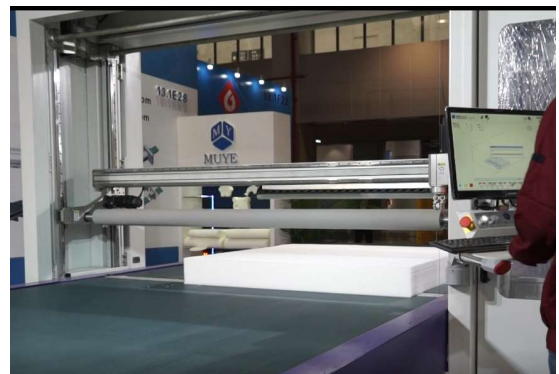

CNC CUTTING TABLE

- Cuts foam and other materials
- Accepts CAD drawings

VERTICAL FOAM CUTTER

- Cuts foam and other materials
- Accepts CAD drawings

FILTER ACCESSORY MACHINES

Auto Snap Band Machine

- Cutting & Riveting In One
- Welded Version Available
- Diam: 100 – 200mm
- Diam: 3.9" – 7.9"
- Width: 19, 20, 25, 30, 35, 40mm
- Width: ¾" – 1.57"
- Custom Widths Available
- Pneumatic Operation
- Touch Screen Operation
- 450 pieces/hour

Auto Ring Making & Welding Machine

- Forms and Welds Wire Rings
- Pneumatic Design
- 1560 pieces/hour
- Diam: 70 – 300mm
- Diam: 2.75 – 11.81"
- Wire Thick: 2.8 – 6mm
- Wire Thick: 0.11 – 0.23"

FILTER ACCESSORY MACHINES

Ring Forming Machine

- Forms Wire Rings
- Pneumatic Design
- 1560 pieces/hour
- Diam: 70 – 350mm
- Diam: 2.75 – 13.78"
- Wire Thick: 2.8 – 5mm
- Wire Thick: 0.11 – 0.19"
- 2200 pieces/hour

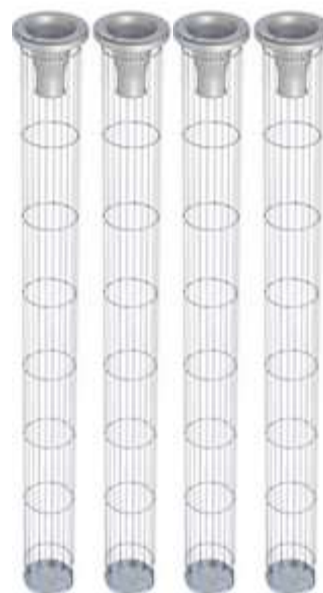

Ring Welding Machine

- Wire Thick: 2.5 – 6mm
- Wire Thick: 0.98 – 0.24"
- Pneumatic Design
- Mild Steel and Galvanized Steel
- 2000 pieces/hour

FILTER CAGE WELDING MACHINE

- 8 – 24 Wire
- Customizable Ring Space
- Outside Diam: 100 – 200 mm
- Outside Diam: 3.94 – 7.87"
- Length: 7 – 10m available
- Length: 275.6 – 393.7"
- 10.8 rings/min
- Call for Moore Information

ABOUT CMOORE

Chuck Moore earned his Textile Engineering degree from Auburn University and then spent two years studying Mandarin Chinese in Mainland China. He spent his first few years of his professional career working for a major manufacturer of needled felt. After spending several years in the food packaging industry, Chuck returned to his Textile roots and ran a filter manufacturing plant. During this time, he discovered he needed to find additional production equipment to expand capacity and replace aging equipment. After researching equipment suppliers, he realized that the best talent in machinery manufacturing was found in China. Chuck was able to use his Mandarin language experience to find quality suppliers of manufacturing equipment. This is where he found his niche in using his engineering, quality, management, and language experience to find reputable suppliers of high-quality equipment.
