BE WARY OF THE SHADOW WORLD AROUND US AND KNOW THIS BOOK IS YOUR DEFENCE AGAINST THE DARKNESS.

Much like in your house, shadows can be scary until you turn the light on. The same goes for the online world. Sometimes when we do not know what we are looking at or dealing with, it can be overwhelming and potentially dangerous.

We are here to help you navigate your way around this online world, arming you with your very own knowledge torch.

Together we can light up these shadowy areas of the online world to know what you may soon experience, what to believe online and what to be cautious of. There are times when you may mess up, but we are here to tell you that you are not alone.

We can show you how to get out of those shadows and back into the safety of the light.

This book is the creation of experts who share their experience and knowledge with you, so your world is less at risk of slipping into the Shadow World beyond your device screens...

Plus, you may find a new interest in the cybersecurity world along the way!
