WHAT IS BRC20 ?

BRC-20 tokens are a new standard for fungible tokens on the Bitcoin blockchain and BRC-20 tokens, with fixed supply, are designed to ensure secure and decentralized transactions. Impossible to change or modify.

Technical Details

BRC-20 tokens rely on the Taproot upgrade to the Bitcoin protocol, which was activated in November 2021. Taproot introduced a new type of transaction called a "Pay-to-Taproot" (P2TR) transaction, which allows for more complex and flexible smart contracts on the Bitcoin blockchain. This upgrade laid the foundation for Ordinals and BRC-20 tokens to be developed.

Inscribing Data

Inscribing data onto satoshis involves using a technique called "OP_RETURN," which allows users to embed arbitrary data into a Bitcoin transaction. This data can be anything from text to images, and in the case of BRC-20 tokens, it includes information about the token itself, such as its name, symbol, and total supply.

Token Creation and Transfer

Creating a BRC-20 token involves inscribing the necessary data onto a satoshi and then broadcasting the transaction to the Bitcoin network. Once the transaction is confirmed, the token is created and can be transferred between users using similar Bitcoin transactions.

In conclusion, BRC-20 tokens are innovative concepts that leverage the power of the Bitcoin blockchain to create unique digital assets and fungible tokens. They rely on the Taproot upgrade and the OP_RETURN function to inscribe data onto satoshis, enabling the creation of new types of assets on the Bitcoin network.

FUNCTIONALITY

Automated Real Time Trading Signals

By the power of automation, iZIP.AI distinguishes itself by offering accurate real-time trading signals. Advanced algorithms and data analysis in backend empower users with timely and accurate data, facilitating informed decision-making and enhancing overall trading strategies comfortably. Moreover,users can access a comprehensive set of tools for a holistic view of market conditions. Details are reserved recently.

AI Crypto Chatbot

iZIP.AI introduces a unique AI chatbot to its subscribers by providing fundamental datas of selected tokens. Your personalized crypto advisor is just a message away, making trading accessible and enjoyable for everyone, from novices to seasoned enthusiasts.

Market Analyze Platform

A pro heatmap, all-in-one indicator, many tools and insights; Our user-friendly interface is tailored for all levels of expertise, ensuring a seamless and intuitive experience for every crypto enthusiast. Dive into the heart of the market with our all-in-one analysis page, offering a comprehensive overview and real-time insights. No more juggling between platforms. iZIP.AI brings you a unified solution, making crypto trading accessible and enjoyable. Experience the ease of use and depth of information on our platform, where simplicity meets sophistication. iZIP.AI is your gateway to a user-friendly and all-encompassing crypto trading journey.

INTERFACE

Provide High Quality Content

Accurate, timely, and insightful market analysis. Include detailed charts, graphs, and explanations that cater to both novice and experienced traders.

User-Friendly Settings

Easy to analyze main parameters. The easier you analyze, the faster you decide.

Real-Time Updates

Real-time market data and updates. Crypto markets are dynamic, and users appreciate up-to-the-minute information.

Mobile Optimization

iZIP.AI is optimized for mobile devices as well. Many users access crypto information on their smartphones, so a mobile-friendly design is in your hands.

TOKEN DISTRIBUTION

Founders: 20% - This allocation ensures that the founders are incentivized to continue working on the project and driving its success.

Developers & IT Management: 10% - Rewarding developers and IT management with tokens will help to retain top talent and ensure the project's technical development stays on track.

CEX Fee: 10% - A portion of the tokens is reserved for the fee charged by the Centralized Exchange (CEX) for listing the token, which is crucial for increasing the token's visibility and accessibility.

Partnerships & Marketing: 20% - This allocation is dedicated to fostering partnerships and promoting the project, which will help to increase adoption and awareness.

Community Pool: 40% - The largest portion of tokens is allocated to the community pool, which will be used to encourage community engagement, reward users, and fund initiatives that will drive the project's growth.

SECURITY COMPLIANCE

Security & Payment Measures: All communication/data transfer between users and the platform, as well as internal systems, is secured through industry-standard encryption protocols to prevent unauthorized access and data interception. Besides, there is no direct wallet connections. Crypto payment gateway is: COINPAYMENTS.NET

CONCLUSION

iZIP.AI

a BRC20 token, stands as a trailblazer in the cryptocurrency trading landscape. By offering real-time trading signals backed by automated bots, an AI crypto chatbot and all-in-one market analyze platform, iZIP.AI provides users with intelligent tools to navigate their portfolio confidently. iZIP.AI is poised to redefine the trading experience for enthusiasts globally. Unlike spurious trading analyzers and channels around the crypto space, iZIP.AI will provide safe and accurate service. No more guessing games, no more uncertainity. With iZIP.AI you are not just trading, you will be making strategic decisions. With right tools in your hands in the wildride crypto space, it is time to empower your crypto journey.

REMEMBER, IN THE WORLD OF CRYPTO KNOWLEDGE IS POWER AND WITH iZIP.AI; THE POWER IS IN YOUR HANDS...
