ENTERPRISES

The level of knowledge and experience that Lee of Pioneer Steel Services bring is unprecedented. This was exactly what we needed. Having the processes in place is one thing, having it in place in a very organized and practical system is yet another. Lee did a great job helping us to organize this and put a system in place that we can maintain. We now submitted our application to become an AISC Certified Fabricator. Lee worked with the strength of our organization and also pointed out our weaknesses. I have no hesitancy to recommend Lee of Pioneer Steel Services to anyone that seeks help to get and maintain their AISC Certification.
