ENTERPRISES

Had the fortune of working closely with Lee during his consultation visit to implement and fine-tune our quality management system. The QMS breaks down the complexity of the AISC BU certification into very simple modules. In addition to having a system that is easy to follow, we now have a framework for quality that is flexible and organic and advantageous to us. There aren't many people like him that have the years of experience, knowledge, and wisdom that he has. I highly recommend him for his AISC QMS setup consultation services to anyone who would ask.
