

**Sean LaRue**

Project Manager at Garco Construction, Inc.

We reached out to Lee earlier this year to utilize his expertise and knowledge to guide us through the AISC certification process. Lee met with our management team and explained what to expect in this journey. He was able to clearly explain the processes and procedures and layout of a good quality manual. From start to finish Lee was a great resource and I can proudly say we are an AISC certified erector. Thanks Lee!
