

We hired Lee not really knowing what we were going to get. Some consultants can talk the talk but cannot walk the walk. This was not the case when Lee showed up to our office. From day one he got involved in our Quality Control Program, tweaked a few things in his system based on how we do things and recommended a few changes to our processes. By the end of the week we had a system in place that was streamlined and easily accessible to all parties. Not only do you get Lee's knowledge, but also a system that he is worked on and tweaked as things change within the AISC program. We could not have done it without you Lee. Keep doing what you are doing as it works. Always appreciate talking to you. He is a guy that will not stop helping even after the consultation.
