

Hyper-secure Content Collaboration. Simplified.

FileCloud can very quickly create value (with a very low TCO) by providing an optimised, ready-to-deploy platform for any On-premise and Private Cloud infrastructure – enabling a high degree of security and control over your most sensitive content.

The solution can be deployed On Prem/Private Cloud, but also as a fully managed, fully hosted version, on a single-tenant, sandboxed environment in the geo-region of your choice on AWS. With NO LIMIT on the number of free, external users!

FileCloud Can Help You By:

Transforming your legacy file server & cloud storage infrastructure into a modern, highly-secure platform for file sharing and content collaboration.

Giving remote/hybrid workforces the full office-based experience without a VPN and without compromising on security, from anywhere, on any device.

Creating a path to Regulatory Compliance with data protection and privacy frameworks measured in days, rather than weeks or months.

Getting away from archaic FTP-server-based file sharing workarounds.

Having complete control and visibility of Data Residency.

Easing the burden and complexity of Digital Transformation, Cloud Migration and Cloud Security.

Preventing Data Leakage and being more resilient to Ransomware attacks.

FileCloud Can Give You the Best of Both Worlds:

A modern, highly secure, enterprise-grade File Sharing & Content Collaboration platform;

WITHOUT any changes to existing file server and cloud storage infrastructure

AND a familiar, consumer-oriented, public-cloud Ux that drives very fast user adoption

Think of us as "**Dropbox On Prem for Enterprise**" (without the public cloud Data Residency concerns and Shared Resources risks) and you will start to appreciate why our customers have given us an NPS score higher than that of Apple!

"FileCloud's only real competition is a do-it-yourself approach, manually gathering together and integrating the many and various components that the FileCloud platform consists of."

– Gartner®

FileCloud has more than 3000 customers and 1 million+ worldwide (92% of which would recommend us to a friend!)
