Laserfiche Software

For more than thirty years customers have been trusting Laserfiche with the security and storage of their content. With clients in more than forty countries and more than 36,000 clients in total, Electronic Content Management and Laserfiche have become a formidable competitor in the marketplace. Laserfiche offers a complete suite of products including business process automation, workflow, records management (DOD 5015.2 Certification), document imaging, e-forms, and a robust API.

Support You Can Count On

eDocsAlaska's Laserfiche Support Team includes experienced, Gold and Platinum-certified Laserfiche technicians. The Support Team offers the latest in industry-specific compliance knowledge, best practices and architecture. The goal of every support request is helping to quickly and easily troubleshoot unexpected issues, provide prompt answers to software questions and treat every client with patience and understanding.

Consulting Guided by Experts

The consulting services provided by eDocsAlaska range from exploratory to post-implementation. You'll experience leading direction, design and documentation of new or revised processes. Through improved capture, management & dissemination of your information, your organization will see faster ROI working with eDocsAlaska.

Digital Signatures Made Easy

What good is having a paperless office if you are still gathering physical signatures? eDocsAlaska provides organizations with the freedom to quickly and efficiently gather digital signatures. With a combination of Laserfiche software, eDocsAlaska integrations, and DocuSign, our digital signature solutions can automate and streamline the signature procurement process with the use of email notifications, automated workflow activities, and automatic document archiving.

Hosting in the Cloud

eDocsAlaska's cloud hosting services allow organizations to lower operating costs, achieve infinite scalability, and improve integration compatibility by moving their server to the cloud. eDocsAlaska will manage necessary updates as they become available and will ensure your server achieves maximum up-time. Best of all, your organization will have a single point of contact for both your hosting and general Laserfiche needs. As with all services provided by eDocsAlaska, the hosting service is competitive and secure. eDocsAlaska has the experience and know-how to ensure your server is being managed optimally.

Backup for the Unexpected

For organizations looking to achieve true disaster recovery-ready status, eDocsAlaska offers a quick and easy way to implement online backup services for all your day-to-day files. Nightly backups of network drives, databases, Exchange, SharePoint, Lotus, and Oracle are transmitted directly in encrypted format with a daily post-backup statistic email update. 24-hour hotline and emergency remote Laserfiche available.

Scanning Your Existing Documents

eDocsAlaska's secured, full-scale document scanning center is the most cost-efficient and reliable option for converting your existing paper documentation. Our SSAE16 certified document scanning services, combined with eDocsAlaska's document management experts, have the experience, equipment, and know-how to carefully and quickly process even the largest amounts of physical records.
