

The Neo-Democratic Party—A Party of Foreign and Transnational Interests, Indulgence Toward Criminality, and the Erosion of Accountability

In other words, a political faction engaged in domestic and transnational hybrid warfare through the weaponization of criminality.

I entered the military in 2006, and I used to vote Democrat. I would never vote for this party today. It is no longer a political party; it is a war front—a war front that targets White Americans, our heritage communities, and public servants, including veterans.

They represent everything I stand against. This is no longer the Democratic Party as we once knew it. It is a party supportive of modern slavery, war, crimefare, communism, and foreign interests, including those of our current adversaries, who are relentlessly targeting Americans, such as Russia and China.

As a retired veteran who has worked in intelligence, homeland security, and combat support, I have no doubt in my mind that they have become an active war. They actively and relentlessly target the United States and our citizens. We are calling it “Fourth-Generation Warfare.”

This party has destabilized. It is time they got the message: Stop hurting Americans. As a veteran, I say this honestly and with conviction: we will not stand for any enemy, whether foreign or domestic. As soon as you harm our people, you cross this line.
