

US **CRIMEFARE IS NOT Laissez Faire**

~Cowdrey

Crimefare is not laissez faire. It is a very strategic operation working underground and in support of foreign enemies. Its sole purpose is to destabilize the United States so that enemy leaders may hold more power and actively dismantle the US, its systems, and harm our people.

It is sadistic. It is cruel. It will not stop until it fully succeeds. Its goal, whether claimed or not, is warfare.

This understanding is not new. It is not a false claim or a random thought. These definitions and warfare strategies are very much by the book and easily understood in the war and conflict fields. They provide us the criteria. We simply provide the name.

Its driver is predominantly power and control. However, it also scales American casualties and looks at war against US citizens and all casualties suffered as a positive defeat. This is an active war.

Its operatives today are everywhere, unfortunately as a result of mass migration, unchecked borders, and relentless foreign targeting of Americans. The cost is financial, spiritual, territorial, and human life.

The government has actively recruited and strong armed a cool and sensitive approach to communications in order to ease the circumstances of war for the American people, component by component.

Yet when looked at from a bird's eye view, with all of the components placed together, the truth of the situation is not one small conflict, or even a series of conflicts. It is rather a very large, very well mobilized global and domestic war. So the US deals with it in parts and has been largely successful.

Still, the left has unfortunately chosen to become a part of the opposition and therefore an obstacle. They are making normal defense and war strategy more difficult and therefore weakening US national security interests, safeguards, and the ability to protect itself.

Worse, some parts of the left have even joined forces to actively strategize with the foreign enemy, whether out of false compassion or truly as a commitment to the harm of the US and its people, as well as an act of treason.

Many think that national security is a game. That claiming the US as a foreign territory is just politics. Unfortunately, this is a huge loss of soul for the United States and a detriment to our country. For these reasons, the US is now strategizing protocols, safeguards, and protective measures without the left party.

Not only has the US lost this national security power that we once naturally had, but the left is actively attacking the United States also. Essentially, the left has turned on itself. They are a

self sabotaging party and the antithesis of national security needs and requirements necessary to sustain a healthy country.

Much of this is part of the plan of foreign enemies. They help create an environment that drives these self sabotaging theories, essentially coddling and comforting the very policies that harm and divide the USA. They are manipulating, grooming, and pushing average Americans to partake in war against themselves.

They do this through false support, narrative building, information warfare, and even friendship and fake love. They create subcultures that pull people in and provide a place to feel welcome. For many they have never felt support like this.

Yet it is false.

It is truly a relationship built to cause harm. Think of a relationship in which an abusive partner requires the victim to get tattoos, to commit a crime, to take drugs, or to participate in pornography. The manipulations of a foreign enemy can act very similarly, ultimately leading the victim down a self destructive and outwardly destructive path.

This also occurs as a social phenomenon, in which entire circles may behave the same way. We can see activist behaviors which have led to absolute terror and destruction of the same communities they preach they seek to protect.

They are not protective. They are not truly safe. They are not truly doing good deeds. They are actively committing acts of war, terrorism, violence, and evil.

So this is what the US is up against.

This is why it is important to vote this November for candidates who truly care about national security, American safety, and the active defense of our nation.

Americans cannot afford candidates who seek to hurt US citizens or our national security. They are an actual national security risk.

US Protect the country. Protect our people. Protect our national security.

Vote out the Crime-Warfarists. Vote out the Party of Foreign and Transnational Interests. Please only choose to vote in support of our defense.
