

Americans are being placed in harms way by organized criminals, this is "crimefare," fourth generational warfare.

Thank you to officer from the Postal Police Officers Association for sharing this important information.

!! READ THIS ARTICLE !!

It describes what America's mail-theft crisis has become: organized crime.

Letter carriers robbed at gunpoint. Postal workers beaten and murdered. Mail-in ballots stolen. Arrow Keys trafficked, counterfeited, and obtained through insiders. Stolen mail feeding sophisticated check fraud and identity-theft operations.

And here is the insanity the article doesn't mention:

The [United States Postal Service](#) has its own uniformed federal police force — and it took them off the streets.

Beginning in 2020, the [U.S. Postal Inspection Service](#) restricted Postal Police Officers from the very places where the crime was exploding: mail routes, collection boxes, and the streets surrounding postal facilities.

Since then, the answer has been electronic locks, hardened boxes, investigations, prosecutions, and Project Safe Delivery.

All useful tools.

But none of them can arrest the criminal standing at the mailbox.

Technology doesn't patrol neighborhoods.

A press release doesn't protect a letter carrier.

And an investigation that begins after the mail is stolen isn't crime prevention.

The criminals adapted...

🚨 The Postal Service didn't. 🚨

Please read the article. Then ask the obvious question:

Why are Postal Police Officers still sitting inside postal facilities while organized criminals are stealing the U.S. Mail outside?

Hijackers Target Mail

Crime rings put us all in jeopardy

Criminals are targeting mail carriers and their keys to every box in a nabe.
