

Our “Reality Shift” - The Big Picture Was Humanity, Reflection On Casework

Sadly, I feel that Democrats have failed to see the big picture. They are too busy being “activists.” I fear the hate and propaganda are too great.

At this time in history, it would seem that Democrats are genocidal toward Americans, particularly White Americans. They are supported by foreign and domestic enemies.

It is a confusing world, but campaigns of hate have never been the greatest idea a Jewish or German person has had.

There is no confusion, the goal is always “momentum” for the “activist realm.” Not often is time taken to stop and “smell the roses.”

That is, America, and her culture itself.

Much like World War II, the general population looks on in horror as the field of politics bleeds into our communities.

It has become evident that, at this time in history, “Democrats” are supporting trafficking rings, mass instrumental migrations, and waging war against their own people.

Out of fear and in search of safety, our people, victims, reach out to the police, who stand on the front lines of the worst criminal industry in world history. Instead of supporting these soldiers of peace, they are fought, vilified, and punished, and those leading the charge look on with glee. A form of entertainment, a success, an inflated race war.

Never has it been more evident, the Democrats hold the flame to the American house they are burning down.

May the men and women of America stand their ground.

Who brings the water, but our honorable public servants? It is clear our public servants are on our side, and we on theirs. We stand behind our military.

US demands, end the war on ethnic Americans.

Send the cartel, gangs, smugglers, foreign enemies and traffickers home to their countries of origin, and bring back peace and stability to the American heartland.

We will be removing all Union components that support these protests as our fears are not just fears, the research is conclusive.
