Reflection:

I think many Americans are confused about what it means to be “White,” and that they should consider protective measures for their communities and heritage in the age of modern slavery and racial targeting of White Americans. This is not Germany, nor World War II, it is 2026, and many White Americans may have felt they were allies, activists, and supporters. Still, American Whites were vilified and blamed, no matter the occasion or black alliances. Today, Whites are being portrayed much like “Aryans,” and that is dangerous territory.

This is a call to modernize anti-racism standards and to consider protective measures for American families and communities. Please protect girls and women, particularly White girls and women who may not realize how deeply revenge politics and anti-White racism can run. Many who, out of kindness, love, and gentility, live their lives with open hearts, only to become vulnerable to modern forms of Foreign, Black and Jewish slavery exploitation. There is also a certain group of White men participating; they represent a particular kind of criminal, “the shady side of town.”

It is sad that people feel they must develop their senses and understandings to this extent in order to keep themselves safe, but that is the reality we face. From Diddy, to Britney, to R Kelly, Epstein, Tate and others, the patterns are very clear. Americans must safeguard themselves from human traffickers within the “realm,” that now exists in the United States.
