

60,000 People Invaded Spain

Please Save Our Communities

I've done the research, and I believe we need to look beyond the surface. The issues we are facing cannot be reduced to economics or globalism alone. This is a real-world plea for recognition, preservation, and healing. The risk is ethnocide, particularly for small, historically marginalized communities whose identity and history can be gradually erased.

Acadians are a small population, and our history is still not adequately represented or recognized. Our communities have endured war, displacement, slavery, and generations of hardship. These experiences have consequences that continue to affect our culture, our economy, our communities, and our ability to thrive.

When our history is not taught, our people are not properly counted, and our communities lose their cultural presence in classrooms and schools, we have to ask difficult questions about preservation and representation. This is not a plea against other peoples. It is a plea for our own people to be remembered, protected, and given the opportunity to heal and thrive.

Our communities deserve to have their history told. Our children deserve to know where they come from. And our future deserves to be protected.

It's time to heal. It's time to remember. And it's time to preserve our communities.

Please help us secure our borders and sign this important petition with me:
