

Weapon of Mass Destruction - Pesticides

Pesticide companies should be placed within the realm of organized corruption rings and fraud. They are trespassing, committing acts of "vandalism by spray," coercing, forcing, and committing fraud. They are exploiting our communities, and they are lying to us about human health hazards.

These companies have interests as high as the Blame sovJF+ Sky and go back all the way to World War II, Zyklon B, an industrial pesticide advertised as gift gas and responsible for killing millions of innocent, vulnerable, and unknowing people. The same is happening to Americans today. We are the most sprayed, the most cancered, and the most killed by cancer than most of the world. This is not an issue to be ignored.

Every issue I have experienced on my travels turned out to be what I thought it was: the worst of the worst. This experience, I believe, is at the top of human harms above most else. I believe it poses the gravest risk, even worse than vaccinations and COVID-19, because of how often it is sprayed, because of the lack of autonomy and rights and the use of force, as well as the clandestine nature in which it operates, the expression of profit over the value of human life, and its direct cause not to heal, as vaccines are intended to do, but rather to kill.

For these reasons, I need the public to investigate and consider pesticides as a weapon of mass destruction, a modern atrocity, and chemical warfare against the American people and our homefront
