

Modern Victory Campaigns

“Jim Crow, Jim Crow!”

“Victory Campaigns”

Happening in the United States

“At home, abroad.”

The globalist “victory” movement is responsible for the ethnic cleansing of Native peoples, particularly at this time in history, includes “White Europeans,” Native Americans, and Christians. Sadly, **this is our reality.**

Origin of the Peace Sign

**Bizarre
World!**

Today's "Power" Right and Left Camps → WWII → Modernized → WWIII

Jewish and Middle Eastern Left and German and Russian Right Power Camps. The Moderate Jewish Camp. The Left Left Angle contains Mexican border control, while the Right Left Angle contains southeastern territorial control.

Foreign invasion and territorial control expand northward from the border. Cartels (WWIII components) seek total territorial control over the United States of America. Globalist activism movements seek total victory over American sovereignty.

Jewish Confederacy, Hispanic Confederacy, Islamic Society, Black Organized Crime and Militias, as well as gangs and cartels, all have their own goals for power and territorial control. However, they often work together to create vehicles of power. American suppression, exploitation, abuse, and slavery are forms of warfare that these activists may employ.

This is our unfortunate reality, and it will only get worse because they operate through full propaganda dramatization, information wars, and fourth-generation warfare. In other words, they have *no chill*. They will constantly fight the American people for total domination and do not care who gets hurt on their warpath for “Victory.”

We are in America, are Americans, and believe strongly in our country. We are not a federation of foreign or domestic religions, ideologies, or extreme terrorists and activists. We love our country, our people, heritage, and culture. We also recognize the pathologies within the activism arenas that are harming the American people and, particularly at this stage, targeting White Americans more than anyone.

As we always have, we root for the victims. We feel that the American people are victims of pathological activism and politics. This is why our strong stance firmly supports American Moderacy and Conservatism. We feel that power should be held by the American people, those who are of peaceful and sound mind and who seek to keep modern war and crimefare down, our public servants and the value of freedom that we love alive.

We do not want any foreign invasion of our territory and want all foreign outsiders to leave. We express this because mass invasion overpowers the energy, culture, and people who rightfully belong here. We view invasion as an exploitation of territory and control, as well as a form of warfare, and feel that Americans reserve the right to peace, safety, secure boundaries, and healthy territorial space.
