

Late Stage

Democrats at this stage in history have crossed the line of committing aggravated crimes against humanity, and still they call it “justice,” otherwise known as revenge by forceful and darkened hearts. It equates to American sabotage and targeting.

The campaigns purposely force demographic changes in a still young American country. These changes can already be seen throughout the country, with fewer whites due to political and instrumental migration strategy, yet the left shifts blame and claims “whitewashing.” No accountability.

Inherently anti American, social revenge supremacists aim for power and control. It is not a matter of negotiation, but of force, coercion, and intimidation.

The campaigns, loud, proud, and clear, express across the board white ethnic American cleansing. “Bend the Arc.” The claim is equality; the aim is fewer whites. It is their slogan, the game they play.

They are supported by foreign enemies, trafficking terrorists, cartels, the mafia, and gangs, as the racism of the movement enriches their death cult, their devil’s enemy: a healthy, spiritual, and successful white American, their families, their children, their victims and their targets.

These trends are seen throughout the world. Now we experience them on our own territory. No, this is not a theory; it is evidenced in nearly every article we read about political trafficking of Americans. It is the truth.

The U.S. calls the left to stop social revenge, instrumental migration, and ethnic white American cleansing.

At this late stage in the genocide, most Americans just want to be left alone. Still, the cult of revenge continues, preying on the vulnerable American, “climbing the ivory tower,” another crime wave, another professional succession.

Crimes against humanity targeting Americans have been committed and proven.

The U.S. calls for the end of American slavery, territorial warfare, and ethnic cleansing, forever.

This message is not intended for Americans who still have their spirit and heart, where being American is not about race, but about our shared love and honor for the America we share.
