

Foreign Propaganda

There is left-leaning news, right-leaning news—and then there is actual news. False propaganda, especially when it portrays the United States negatively, can be extremely harmful and even put Americans at risk.

That's why I've made the decision to block propagandists—particularly foreign actors—at this stage in the conflict. Racism of any kind will not be tolerated either. Racism toward whites is no different than racism toward any other group, and anyone—whether a citizen or a foreigner—who engages in such behavior should be held accountable under the law.

I've seen the damage this causes firsthand. In this country, we protect Americans and put their safety first. To those who believe it's acceptable to attack the U.S. or its people without consequence, that time is over. I stand firmly for America and the values it represents. Standing up for our country is not optional; it's essential—because if we don't, we leave ourselves vulnerable to further attacks.

Not negotiable. Protecting Americans is not up for debate—it is our duty, and there will be no compromise. America will always stand strong, protect its people, and preserve the values that make us who we are. To those who would attack, divide, or undermine us: know this, America defends.

**AMERICA
DEFENDS.**
