Democratic Socialists: Abolish Ice was just an activist Twitter slogan. Instead of taking it with a grain of salt, they made it into a "pepper PAC" and ran with the ideology, placing American safety in danger. Instead of remaining bipartisan on the issue of border security, they joined foreign enemies in their pursuit to divide the country and harm the American people by supporting terrorism and mass instrumental migration. Activists joined the enemy side of the war. If it were truly all about humanity, American safety would have remained their central concern.

Every day we lose a brave American to this fight. We pray for the families of the soldiers on the front lines who have lost their lives amid this ongoing turmoil. The political left has not only supported these conditions but has also contributed to them, aggravated them, and attempted to prevent Americans from protecting themselves. These actions have intensified political division, hurt and violence. They have contributed to civil war, political violence, the targeting of Americans, atrocities, murder, and genocide.
