

### 30 Democratic Changes We Cannot Count On

1. The word *native* is now "Nazi."
2. The word *White* must be lowercased as "white" anywhere near the word *Black*.
3. Male nightlife entertainers now teach kindergarteners against the will of their parents.
4. People are no longer allowed to use locker rooms or bathrooms unless they are willing to share them with members of the opposite gender.
5. Churches are no longer safe because they are being set on fire.
6. Police used to patrol the streets, but now we have to deploy the military.
7. Absolute demographic shifts, including total cultural replacement, are celebrated, even when foreign flags are hoisted and locals are attacked.
8. Foreigners are promoted over locals. Whites are still attacked as the "supremacy," even though they are three or four tiers down the ladder compared to newly arriving foreigners (especially from BRICS nations).
9. Taxpayer money goes to foreign activists, especially Israeli, Russian, and Latin American PACs, rather than to the homeless.
10. People who do not work make more money than those who do.
11. They verbally assault people about the environment while trashing it at every protest, concert, and party.
12. Female victims of violence endure further victimization and stigmatization by human rights campaigners.
13. Humanity is afforded only to certain people who are suffering (political selection).
14. There are constant demands for "toys" or products, but little gratitude for them. The same companies that provide what is demanded are often targeted anyway (just like in the movies).
15. Spending time in jail is promoted as a worthy cause to young college students; jail time is glorified. They are anti-police, yet in emergencies, the police are called.
16. Segregation and discrimination are widely celebrated, promoted, and accepted, but only when certain groups engage in them, only if they like you, and only if you agree with their ideology at the time.
17. Cancel culture has become normalized, much as dehumanization was normalized during World War II, but because it has a new name, it is considered acceptable.
18. Women's rights spheres are now run by men.
19. There is no such thing as the American flag, American values, or... Americans anymore. Instead, American natives are placed on the "grid."

20. Within "rights spheres," surveillance has become normalized to the point of political trafficking, espionage, blackmail, stalking, voyeurism, weaponization, and data slavery.
21. Instead of healing and eliminating homeless encampments, they promote adding more drugs and litter to them. They create the forms, but they never get to them because they are on vacation instead. These are called "operational costs."
22. They promote "No Kings" protests while also promoting "anti-Jewish hate campaigns," all while committing fraud to the level of a "monarchy" or "dictatorship."
23. Anti-military during times of war, they still promote anti-gun laws. There is more gun violence within their own party lines, yet they target the same people who actually took gun safety courses.
24. Increasing some "numbers" while promoting the decrease of others through eugenics campaigns. Anti-natalist, but only in White majority cities. They target "old-fashioned family values."
25. Against slavery in all forms, except when it is convenient or overseas; then they support it.
26. They preach "solidarity," but only if you have a certain counterculture "anti-American values" vibe.
27. Anti-abuse, except against Whites, that is considered perfectly okay and even welcomed, including against White victims of Black slavery.
28. Absolutely no environments are safe for elders or children, only for "popping bottles," peddling, and prostitution.
29. The world's entire population is considered a minority, but only if they are not White, even though Whites are the actual minority in many places.
30. English is no longer the primary language spoken in many towns, despite them historically being English-speaking towns. English is now frowned upon.

**The list continues.**
