

It's Taboo, It's Voodoo, It's Little Boy Blue, To Talk About White Humanity, Rights, and Abuse

Cowdrey

The suppression of rights, White humanity, and the truth of abuses within the White community are issues that the mainstream media often avoids. It remains taboo to openly consider White humanity, suffering, and vulnerability in the news, universities, and public discourse. This experience is dangerous for White Americans, especially because reality is denied during times when foreign enemies seek to use every instrument possible to harm Americans, including instrumental migration, race war, and population replacement.

Universities have undoubtedly discriminated against White Americans. This is evident in their hundreds of thousands of articles. Nearly all of the talking points within these articles concern every other race but White Americans. The White American male was not even included, practically a ghost and a relic of the past.

The destruction of a nation in one generation, Gen Zoomer. They zoom to America, protest it every step of the way, create harm and havoc for Americans, particularly the White Boomers. Our heroic elders are obviously an issue, despite building the country we all enjoy.

Yet, discrimination against Americans has never been so clear. How many lawsuits does it take? Still, suppressed. An epic journey into the unknown, searching for speech on White rights and humanity. ACLU, ADL, SPLC, foreign political PACs, the dominant organizations, stolen cake.

Even White Americans have yet to fully grasp their new normal: that their culture is experiencing near-complete cultural replacement. They call it "diversity" and "multiculturalism" and scoff at Whites. "Gentrification"—White neighborhoods too peaceful for them? They wanted looting and "violent street takeovers" instead. Their enemies consider all avenues, sponsorships, whatever it takes. 500K? One million? How about ten? Next year? Let's play a game: "Torture Americans, pandemic in the hen."

It never ends. Yet, that is the game for them. Americans call in sick; that's their in. Leverage, latitude, one American down, now it's my turn. Now it's my chance, song, rhyme, and dance: "Bye, bye, American Pie." Chevy was a Hispanic company after all, didn't you know, Gringo? We are territorial. We will set it on fire if we have to. "Fire, fire, fuego, Gringo." We'll be sure to let you know. As for you? Shhh. Silence. Silence or else. This cake, car, country is all for me, not for you, American, Little Boy Blue.
