

New Democratic Party

Americans are increasingly being called upon to reconcile with the reality that the New Democratic Party is actively and forcefully seeking, through conduct defined and characterized as acts of warfare, to facilitate or effectuate the establishment of a foreign-aligned, war-supporting communist regime.

So, this is our “New Normal?” How do we really feel?

Americans have demonstrated considerable patience and restraint thus far. However, perhaps the time has come to demand stronger defenses and lawful, constitutional, and institutional measures to protect our nation, our sovereignty, and our safety.

I do believe in the revocation of citizenship for war-aligned actors for this reason. This may include first or second generational citizens. I do believe in amending the Constitution to protect our country from terrorism and fourth-generation warfare, and I do believe that power should be stripped from any foreign-born judges and immigrants who are serving against the interests of the United States and our people.

They can serve in other capacities that are not within the field of immigration, which can be used as a form of warfare against our people. Furthermore, positions within journalism and sectors of our public institutions that may be used as forms of modern information warfare should be subject to the same consideration.

The same is true of the biological, chemical, and healthcare fields. These experiences are not small or isolated, but we are actively fighting a war that has masqueraded as normal society. We need stronger measures. This is not a question, but a necessity in order to mitigate factions of the war.
