

HYBRID WARFARE AND ACCOUNTABILITY

"THEY LET US BURN." CEASEFIRE

The Democratic Party needs to be fought. They need to be brought to their knees. They need to be told: you are not normal, you are a HYBRID WARFRONT, you are a CIVIL WAR.

The party operates through entitlement, low punishment, and low accountability. Make them ACCOUNTABLE. Remove their privileges, remove their benefits, and take away their free handouts.

Tell them they cannot destroy the streets. Tell them no more taxpayer exploitation and slavery. Install higher punishments for the warfare they are committing to. Deport the foreign territorial cartel they support.

Stop placating their abuses and stop placating their insanity. Let them know that we are not normalizing any form of insanity that they are trying to perpetuate. We are not going to accept the destruction of American communities as something that must simply be tolerated.

Drugs, houselessness, taxpayer exploitation, chopping genitalia off and then acting like that is okay for children, and voyeurism are all issues that must be confronted. Stop pretending that destructive behavior becomes acceptable simply because someone demands that society accept it. It is all a form of modern warfare.

They must be challenged deeply. Attack the problem at its source. Go directly after the policies, systems, behaviors, and people responsible for the harm. Show them what they contributed to. Show them who they hurt and what consequences their actions have produced. Show them why society is no longer accepting them and why they have lost the trust of the American people.

They must understand that Americans are not required to tolerate abuse, destruction, exploitation, or lawlessness. Political power should never provide immunity from accountability. No one should be permitted to hurt Americans and then expect society to simply accept it.

They need to be confronted with the consequences of what they have supported. They need to answer for the damage that has been done and the people who have been harmed. Accountability must replace entitlement.

They are killing Americans. This is how you deal with a petty Democrat who thinks they can do whatever they want and hurt whoever they want. Challenge them, expose them, and hold them accountable.

Stop rewarding the behavior. Stop normalizing the abuse. Attack the problem at its source and make them answer for what they have done.
