

Power of Language

The Coercion of Women's Sexuality, and the Weaponization of Women's Sexuality

Cowdrey

Why Union of Saints Does Not Support Purity Culture, and assuredly not purity slaveries, in which everything a woman does is weaponized against her. *"Yikes, we don't talk like that."*

This is dangerous territory, often driven by narcissistic abuse patterns; smear campaigns, triangulation, and power grabs over a woman, spiritual and psychic wars. These individuals, not only men but sometimes others who share these dynamics, could spend this time working on themselves. Instead, they often choose to harm others in order to feel more powerful. The opposite is true, it lowers their character, especially in the eyes of God.

God wants human beings to be free, not free in ways that cause harm to others, but free in autonomy, independence, and true liberation. God calls for human beings to stop causing harm and suffering to one another. This is the prophecy of our time, and the message God hopes to send to the world. God as our guiding star.

We understand that not all churches teach this, but we are not all churches. We are a completely new development within our lifetime. We are divinely connected to brighter, evolving understandings of life, nature, and God. We not only listen to this evolving message, but we apply it to a broader understanding of human history, evolution, and present-day spiritual expression.

We are a very special, powerful, and beautiful church ~established by a woman. A woman who understands present-day human nature, and who has lived through many generations of change; the 1980s, 1990s, 2000s, 2010s, and now the 2020s. She carries with her the wisdom of earlier generations, her parents, her grandparents, and those before them. Our roots extend into beautiful heritages, not without hardship, and not without the brutal realities of human existence.

Still, we take old wisdom and apply it to new understanding.

We believe we have achieved something miraculous and special, a prophetic revelation about human existence. That revelation is this, human beings must change the very language we speak, creating a new culture of existence in which the language of slavery becomes an alternate world, one we do not trespass, nor allow to trespass US.

Instead, we move forward ~marching~ toward a higher vibration of heaven, which is God's true aim, to bring heaven to Earth and create a more peaceful world for all of creation. This is our US goal.

We move forward from the deep wounds of slavery-focused language into a deeper understanding of humanity, of love, compassion, and higher light. No, human beings are not perfect, but we can create space for learning, adapting, exploring, and enjoying life, while still holding onto the beautiful wisdom of God's freedom.

Together we can achieve American and Global freedom with far less suffering, and far more life.
