

End Fourth Generational Modern Communist and Mass Instrumental Migration War on American Culture

Though many places in the United States have not yet been affected, if the trends continue, mass migration can wreak havoc on local American cultures. Violent crime rises, children and babies go missing, vehicle accidents rise, gang violence increases, demographics begin changing, the local culture begins changing, White men and women fall into the trap of self-victimization, perpetuated by race targeting and race wars, Whites commit mass suicide, as any other holocaust has seen. Local politics begin changing, foreign money pours in, the police become infiltrated, and we lose our culture, our people, and the war.

This is not a gentle war. It is incredibly difficult for the locals, who become the primary targets. As soon as foreign numbers grow, the mass targeting begins, the energetic field changes, and memory is lost. Worse, it is purposefully erased. They begin targeting the locals, saying, “Get out!” They say, “This territory now belongs to us.”

It is a slow trickle in, but the purpose is to alter the demographics, to “bend the arc” of the White population, and to gain power, control, and territory. They will exploit local taxpayers, as generation after generation, the local families of their communities built their societies from the ground up and on the sweat of their own backs. Now newcomers will exploit this. They

will never have to work, they will enjoy the fruits of the labors of others via taxpayer exploitation and communism.

They will say racist things, such as calling Whites colonials, saying they should go back to Europe, and calling them crackers, Nazis, Hitler, and other really harmful things. They operate like any violent clan and war front. They take aim, and they take it all. It is a real war on the American people, and it must be stopped.

Our culture, people, territory, and home are not up for grabs! We want independence from any sort of territorial invader. We want protections for OUR AMERICAN PEOPLE. We want to take no part in any culture-altering, manipulating, or warping. This is our call to stop mass instrumental migration, mass demographic shifts, and population replacement in our home communities.

No modern derangement! Enough is enough! End the fourth generational war on Americans. End communism. End territorial invasion!

In New Hampshire, Vermont, and Maine, we have many Francophone communities whose families suffered great pain and heartache upon rediscovering a nightmarish genocide that still affects our communities today. Our families suffered generations of indentured servitude, cultural erasure, forced assimilation, and hardship. Still, our culture was built beautiful and strong, reflecting our values, despite remaining a minority population.

Many of us remember our families speaking French. However, the soldiers of Great Britain and the KKK relentlessly targeted our families, and religious heritage and kept us from speaking our native languages, including French, Acadian, and Mi'kmaq. Today, we are still struggling to keep this memory alive. This is why we cannot have foreign cultures working their way into our culture and trying to imprint upon it.

They should not be actively attempting to imprint Spanish or any other foreign language onto the Acadian people. We also speak Irish and, predominantly, English. We have other members of our community, such as Italians, this is our heritage and culture in Northern New England.

We expect that our culture is respected and never impressed upon by those foreigners who are visiting. This is a boundary we are very serious about: no forced cultural assimilation, no mass instrumental migration, and absolutely no forced diversity arc shifts perpetuated by modern fourth-generational warfarists and White genocidal activists. No clan allowed, no cultural warping, no "White supremacy" blame-shift and gaslight politics. Northern New Englanders are a Native and Native White American-Canadian group.

Our families and our communities MUST BE RESPECTED. This is not an option. It is not a political debate. We've seen the havoc that modern activist cultures have caused and participated in causing, with billions upon billions in damages to local communities, acts

of arson and terrorism, and violence against innocent and vulnerable White victims and families.

Enough is enough. We will not tolerate any activist violence, and we will NEVER tolerate forced demographic changes on our already marginalized populations. These communities are not just “American populations,” but are our families. They are who we are, the culture we love, and one that we DO NOT WANT TO CHANGE.

Please respect the North American Native culture. We ask respectfully, but this is also a firm demand. No tolerance for fourth-generational warfare on the American people, particularly White American and Native Canadian people who have been the victims of relentless activist targeting for decades upon decades. We’ve had ENOUGH.

We demand respect of our local Native Maine, Vermont and New Hampshire communities and society. *No territory war! No communist war! No fourth generational war!* KEEP OUT!
