I do feel that this has a lot to do with *demographics as well as illegal immigration*. I also feel that it is being used as a weapon of war, particularly against the American people. However, it has targeted vulnerable people in general. Like census data, this data is also not fully accurate and does not capture the full picture. For example, revenge pornography and other forms of modern slavery are not included in this data.

Within White culture, there are Johns, prostitutes, pimps, traffickers, and trafficked victims, as well as red pill targeting and revenge pornography. Another consideration is which race within this culture is perpetuating it the most. As we have learned, there are activist movements that have cultivated sub slavery movements, and some are perpetuating revenge pornography more than others, such as the LGBT activist community, as well as within the Russian and Israeli activism spheres, where some participate for political gain or commit acts of cyberwar and engage in Kompromat. A more high profile example was seen when OnlyFans made donations to AIPAC.

I have spoken to women from many dimensions of society, and this experience was not rare. The normalization of human slavery is also experienced through abuse and social patterns. It is safe to say that culture has experienced a shift.

I am very grateful to all of those who are helping to tame whatever went wrong. Clearly, the line is drawn. We will endure living and sharing in several cultures at once. Some human experiences are not forgivable. Enslaving another human being is one of those experiences.
