

The Creation of Race War by Foreign Immigrant Packs

American Boundaries and Borders

Imagine if we went to *their* home countries and told *their* representatives that they had too many of *their* natives representing their country. That we would sue *them* for discrimination so that we could hold more power in a foreign country? Imagine.

Imagine, *their* native population was rapidly declining because their citizens were in so much pain and suffering, they were mass suiciding. Imagine if they were being mass targeted by the undercurrents of our foreign movement, in *their* home countries?

It is absolutely new colonialism, and it is modern warfare.

These are foreign race packs, essentially gangs, which target predominantly White Americans, and not a little either. They mobilize, they strategize, they target. They even support smuggling and the cartel for territory control. If you have witnessed this atrocity, and are a native dissenter, they call you “n*ziS.”

They actively promote mass migration for power. They represent themselves. They actively promote genocidal hate speech against the Native American population. They actively discriminate while blame shifting and spreading horrifying forms of false propaganda against our people. Worse, they actively seek to destroy American culture, vilifying everything to the worst of extremes, while promoting their own culture and hoisting foreign flags.

They march and parade while using violence, setting fires and targeting our public servants. Worse of all, children are kidnapped, theft rings and looting rings are used as a form of “protest” targeting Americans, fathers are disparaged, even elders are targeted.

Again, this is not a native population, this is a foreign population, and they absolutely seek to have supremacy within the American nation.

They are posing a grave danger to an already rapidly declining population. The statistics are grave. No, this is not a conspiracy. Americans are facing a foreign political war front.

The choice was clear, assimilate into American culture. Support American culture. Be friends with Americans, and participate peacefully. The choice was never replace Americans, sabotage Americans, target Americans, or try to push out Americans from their rightful political seats.

Americans must consider the *legal eradication* of political foreign race packs that actively target the American people. This is not an option! *It is a means of survival.*

1. Support elimination of foreign race packs as **unconstitutional** and **discriminatory**.

2. **Create your own White American race pack**, and when they sue, take them to court and challenge them every step of the way.

They know what they are doing, they feel entitled, they are stripping Americans of their own territory so that they can feel more “comfortable,” having supremacy over the American population. It is not

the way forward. The way forward is American safety, boundaries and borders. Protecting Americans is the principled thing to do.
