

Anti-White Campaigns: It's 2025, It's Sick

Sick As It Gets

- Targeted White Population
- Rapidly Dwindling White Population
 - White Slavery
- Daily Terrorism and White Targeting
- Rapid American Culture Shifts
- *Still We Are Denied Reality*

Getting With The Times & The Real World:

I did not realize that “whites” could be in “excess.” My mind has substantially changed, and I now believe that “anti-racist” campaigns are simply genocidal and incredibly *sick* toward the white race.

I view this as a social pathology, not as an “anti-racism” campaign, because these structures are inherently racist toward whites—not against any other race. It is a power strategy, but one that robustly hurts white Americans.

They move to exclude whites—no other race—and are succeeding.

That's war, not “equality.”

There is no such thing as “excess whiteness.” This is considered a “socially acceptable term.”
I don't think so.

If excess whiteness were true, then “excess blackness” would also be true.

Where is the humanity in this statement?

That's your race war, not your anti-racism campaign.

Who is the author surrounded by in her social circles? Not one white person.

That's total exclusion, the goal? Sure seems like it.

Summary: End the race war against white Americans.

We have seen enough, and we have had enough.
