

not observe cancer in humans after feeding fipronil to test animals.^[9] Similarly, no human data have been found on chronic effects of fipronil.^[8]

No Data, Can You Believe That?

How does no data exist, and yet hundreds of thousands of lawsuits do? No data exists because it has not been collected. → The day is young.

The United States is behind the times, and unfortunately, people are dying because of health and safety neglect and negligence.

Life must be valued, pesticides must be banned.
