

The Haunting of the Holy Ghost

(Mother, Father, OZIRAH)

The experience can be both beautiful, compassionate, kind, and loving, or karmic, haunting, harming, and cruel. Without balance there will be war and slavery. With balance there will be peace and freedom. It depends on the spirit or spirits of the souls and whether humankind has restored the balance, particularly in honoring the mother and freeing her, rather than suppressing her and solely honoring men, the father and son.

The full picture is not always what the stories passed down tell us, yet the lessons of the story and the ability to read between the lines reveal more. The greatest lesson is the ability to pursue the whole truth and to see that the mother's story is also told. She does not live within the *Kingdom of Jews*. She lives in our hearts, the earth, the ocean and in heaven. She is all, the Queen of Heaven. She lived long before. *She is our mother.*

Women who experience their atonement and revelations with the mother will see the bigger picture. It is really cool because it seems the story is not fully told, yet the mother will reach us, and she shows us the true story.

Because the story has been so hidden, one must search and search to find it. The mother restores our faith because she shows us the story that has not yet been revealed.

After your revelation and message from the mother, she will guide you like a star to see the truth and the whole picture. Truth, academic research, history, and science may also guide us!
