

*How to be prepared for war.*

*There is a foreign and domestic war machine on our  
soil,*

*and it is widely attacking our American people.*

*We are doing our best,*

*but Americans have fewer protections than we would  
hope,*

*especially White Americans, who are the least protected  
of all races at this time in history.*

*It may seem that we are protected,  
but realistically, Whites are bare-boned.*

*Our protection moving forward is teaching each other  
one very underspoken lesson:*

*How to be prepared for war.*

*Safety. Protocols.*

*Follow police speeches to the public.*

*Stay alert.*

*Be steps ahead of the enemy at all times.*

*Have a passport.*

*Be prepared and vigilant at all times.*

*Don't trust strangers.*

*~Know Your God~*

*Hug your family <3*
