

Blurred Lines, Blurred Boundaries

The pattern of blurring the lines, or blurring the boundaries, and why it is more important today than ever to draw the lines, for human safety, while also remaining creative, open-minded, remembering humanity, and maintaining compassion throughout the process. Much of these issues are expressions of blurred lines, boundaries, and borders in many contexts, including males and females, Blacks and Whites, Latin Americans, Jews, etc.

The Major Lessons

Who, what, when, where, why, humanity, autonomy, dignity, public order, security and safety, racial conflicts, the whole truth and history, and the deep roots of revenge politics, blurred boundaries/lines/borders, right from wrong, spirituality, faith vs. abstract spiritual movements that harm and are cruel (targeting churches), LGBT movements that turn into trafficking rings or groom children, etc.

There is so much to it, and it is very complicated, but we can also simplify things by focusing on those healthy safety and “boundary lines.”
