

Beware 4GW, Trafficking, Cartels & Harmful Pesticides

Beware of fourth-generation warfare, cartels, trafficking, and harmful pesticides.

Beware fourth-generation warfare, weaponized migration, mafia, cartels, organized crime, race-targeting, trafficking, and harmful pesticides.

Pesticides:

We found that illegal pesticides are being sprayed all throughout the United States at levels far above legal use. DDT was outlawed; some modern sprays are **6,000X** more toxic. Some marijuana products were found to contain **762 times** the “base level.” This is what our citizens are inhaling. The products cause irreparable damage to the thyroid, heart, and reproductive systems. Even skin exposure is painful.

BASF is the same company responsible for killing millions during World War II and is still the same corporation selling insecticide products today. Today, Americans are being sprayed. This is more than a warning; it is a **modern war cry**.

Foreign cartels and mafia, the fourth-generation war, are within our borders, operating in secrecy, and are hungry for American territory. *Less Americans means more room for them. Making sense? **It is a real war.***

It's time to get real. Be very cautious about any product that may contain pesticides. **Do Not Spray.** Be vigilant regarding culture shifts that are rapid, any foreigners wearing camo, watch out for **dangerous foreign traffic**, or any other suspicious activity.
