

American History

Many Native Americans are still figuring out their own history.

We became Americans. American is an ethnic population.

Yet, immigrants who hardly know our country are actively attempting to retell **OUR story**, or are attempting to **erase it**.

*This is not the only atrocity Americans are enduring by **evil foreign story-tellers**.*

*The **relentless targeting of Americans** has become so widespread, it became an **actual war**.*

*I do hope that the American people come together and they tell these people, **where they can go**.*

*An evil this great, really is not a part of the American family, **far from home, far removed from us**.*
