

Democratic Party Is As Intelligent As It Isn't

1. Extreme Advocates

“Native Americans”

2. Extreme Opposition

“Native Americans”

3. Real Native Americans strongly oppose forced colonialism and forced immigration.

4. Real Native Americans are not all immigrants, do not share the sentiment of all immigrants, do not want to share with all immigrants, and truly seek sovereignty, distance, and safety from all immigrants.

5. 70% of foreign-born Latino voters identified with or leaned Democratic. 73% of Latinos are first- or second-generation immigrants to America.

6. 44% of Democratic and Democratic-leaning voters were Hispanic, Black, Asian, another race, or multiracial.

7. A 2021 Cato survey found that 48% of first-generation immigrants identified with or leaned Democratic.

8. 11% of Democrats reported being born outside the United States.

Percentage of Democratic voters who are new immigrants: 40–45% as a reasonable working estimate since roughly 1926.

*This experience explains why the narrative is not fully aware of American history, or is actively seeking to erase it in order to support the “New American” voter base. It wants to create more opportunities for immigrants, and this is the primary focus, rather than recognizing that the American Dream first belongs to Americans, and Americans are not all immigrants, **far from it.***

America is built by Americans, actual ethnic Americans whose families settled here centuries upon centuries ago. Though politicians at this time are making many claims, unfortunately, they are untrue and are mostly supporting those within their own voter base and perception, rather than the American people as a whole. This party has become dangerous to the American people.

*The Democrats are **ethnically cleansing the American people** through inhumane policies and the forced establishment of new colonial settlements and foreign enclaves. They have committed crimes against humanity. They are actively attacking and at war with the ethnic-American people.*

They are unfortunately not representing the American people the way that we need them to. They will continue to diversify America based on their own race and ideology and could be responsible for the extinction of certain ethnic American races within the United States if they are allowed to continue with their agenda without being halted and forcefully-so.

This is not a conspiracy; it is a real warning, especially with how adamant they are about pushing for open borders, the abolishing of police and ICE, their support of fourth-generational warfare,

crimefare, foreign enemies, communism, and what we are realizing now as their support for modern forms of exploitation and slavery.

What a time to advocate for crimes of necessity and allowing rapists to roam free. Who does this benefit? Those within the ranks of the Democratic Party. They are supporting both warfare and slavery.

*The dichotomy of their policies is not by mistake. The experience is a form of psychological warfare: **contradictory influence, deception and disinformation, confusion operations, divide and influence, and double-blind messaging.** Their policy has been intelligent as the war we are facing, yet there is a lot, a whole lot, of grossly irrational judgment, their “New American” policy has failed the American people. It is betrayal and treason. For actual Americans, the Democrats, you have betrayed the American people.*
