

Pesticides Kill “Aquatic” Animals

We Are Aquatic Animals

From conception through life in the womb, and throughout our lives, our organ systems develop and function in fluid-rich environments.

Frog in your throat?

Our reproductive systems?

The fluids that move throughout our bodies?

Water helps support and protect our highly sensitive tissues and organs.

Pesticides hurt human beings.

Which is why their use is outdated!

- Please end the Age of Pesticides!

**PESTICIDES KILL
“AQUATIC” ANIMALS**

Dead fish in Apopka after pesticide exposure.

**WE ARE
AQUATIC ANIMALS**

From conception in the womb, we are surrounded and protected by life-sustaining fluids.

FROG
IN YOUR
THROAT?

OUR
REPRODUCTIVE
SYSTEMS?

THE FLUIDS THAT
MOVE THROUGH
OUR BODIES?
WATER?

THEY HELP
PRESERVE OUR
HIGHLY SENSITIVE
BODIES.

**PESTICIDES HURT HUMAN BEINGS.
THEIR USE AT THIS STAGE IS OUTDATED!**

PROTECT
OUR WATER

PROTECT
OUR CHILDREN
