Foreign Smear Campaign?

If so, the BLAMESOVJF+ SKY~VECTOR WAR is FALSE BLUE, nothing new.

This organization raises concerns for many American citizens who feel that the civic voice of U.S. citizens is increasingly overshadowed by organizations advocating primarily for **foreign nationals who have allegiance to other countries**. While advocacy has a place in a democratic society, the blurring of lines between citizen representation, territorial integrity, and foreign political interests leaves many Americans feeling politically displaced within their own country. Other countries parade on our territory and call it cultural diversity, yet the interests of American citizens are not being adequately protected, prioritized, and heard.

The border lines are being blurred.

Many of US voted democratic our whole lives, out of concern for America-All, but it has become evident that the current democratic expression is foreign warfare against the American people. These are *very real* wars against US created by foreign nationals and their supporters.

These are not Americans, they are foreign nationals. Their supporters are confused by foreign influence campaigns and negative propaganda by the FALSE BLUE party.

US supports the troops, our country and the American people.

We are not in support of people who come here and pretend to be American, while seeking to take American's place via territorial invasion and cold war campaigns.

American is not Mexico. Real Americans stay TRUE to the RED, WHITE AND BLUE.
