

Pandemic and Prayer

I do know that many activists have fought this relentlessly and do show up every time there is an event such as Kapparot. It is incredibly stressful. The events are bizarre and disturbing. Blood is everywhere, and you can hear the animals suffering.

I do question Jewish, Palestinian, and Radical Islamist activists and their ability to hold rites participants accountable. Any "religious, spiritual, or ideological" animal sacrifices need to be federally criminalized, particularly when they are conducted on public streets in front of the public and can create significant public health concerns through potential disease transmission, as raised during our experience with Kapparot and Covid 19.

The topic I bring to light has been labeled by others as "pandemic and prayer."

Response

The city council
in Hamtramck, Michigan
with a Muslim-majority
legalizes animal sacrifices.

Where's the outrage?
Where's the animal-rights activism?
PETA is pretty silent!
Why?
