The Take and Abolish American Safety Movement

The Neo left wants America to support the aiding and coddling of criminals. They want us to believe that the worst acts of humanity are no big deal. Murder? Abolish prisons; they need hugs instead. Looting and organized theft rings? Crimes of poverty; they just needed toothpaste.

Genocide? It's just diversity. Forced medicine that causes cardiac arrest? Achieving "herd" immunity. Tax exploitation that supports terrorism? It's just politics. Reintegration of criminals who commit atrocities? Inclusion. They have supported smugglers, traffickers, cartels, pedophiles, and violent criminals. They have become a party that normalizes forced filming, revenge pornography, and human trafficking. They are normalizing prostitution and stripping for the foreign enemy.

They have gone beyond the boundaries of any form of normalcy to advance their movement. By far, this represents some of the most aggravated gaslighting, manipulation, and violation of spirit that any political party in the United States has ever committed itself to. They became such a threat that average Americans felt afraid to speak out in support of Americans, their own country, and themselves.

This party has actively ghettoed parts of America through its support of acts that include looting, vandalism, arson, violence, fraud, negligence and destruction. Of course, they want Americans to accept this as normal. They do not want Americans to know the whole truth, their party descended into criminality that actively hurts and kills the American people in support of an extreme, fantastical ideology that does not even fit within the boundaries of normal politics.

They commit crimes, seek revenge, and kill people because they are not getting their way. It does not matter how much Americans have given them. Welfare? Free education and grants? Free food? Trillions of dollars in supportive programs? It was never enough.

They want slavery. They call it communism. They want corruption. They call it disruption. They want others to suffer more. They call it success. They want to force themselves into natural and normal society. They want to commit crimes of humanity and get away with them, too.

They want to coerce the public into believing that all of this is normal, just, and good. They have joined foreign adversaries, raised foreign flags, and committed treason. They call themselves a "party," yet by far, they are one of the most evil spirited entities we have ever experienced.

They are not a political party. They are actively seeking to "dismantle" the United States as we know it. They have committed acts of war. They are a warfront, a slavery front, and a genocide front. They are no longer part of normal society. They spy, blackmail, operate in

secrecy to gain leverage, and build organized corruption rings around innocent American people.

Integration is not possible. They must be rejected, voted out of power, and denied any further opportunity to dismantle the United States. Their movement must be labeled for what it is: a war against the American people.
