

Moka Coffee Shop: Unfortunately, this may have been a Chinese or Russian communist who vandalized Moka Coffee Shop. There are a lot of foreigners out at night, particularly Chinese/Asian individuals in the Northeast. They are everywhere. The experience is dichotomous because saying so may result in “blame-shift politics” or being labeled as a “racist”; however, the experience is not normal for Americans to have unrecognized foreign nationals out everywhere at night.

Some wear hats, some wear camouflage, and they are often meeting with others, potentially gang members, cartel members, or undocumented individuals. I am very suspicious of the movement, particularly at night, and feel that Americans should be careful. Currently, ICE-out campaigns are being bolstered by foreign immigrants and have greatly suppressed the American voice. The experience overall is not normal.

Many individuals out at night are males and military-aged. Others seen out at night may be traffickers or victims of trafficking, and may also be a part of the movement, or may be involved with a cartel. The demographics are not normal for this region, and the census data is not reflecting the demographics.

Our best guess for this vandalism event is that it was → Chinese or Russian communist.
