

# Anointing

## Remembering:

Men may be more attuned to their identity as men, and therefore their anointing with the father or son (sun, light, social, patriarchy, brotherhood, searching, external).

Whereas women may be more attuned to their identity as women, and therefore their anointing with the mother, daughter, or sister (ocean, moon, intuition, matriarchy, sisterhood, gathering, internal).

I believe God's path and the message for us during this time is to understand this instinctual human and soul experience and to "unionize" both. To accept our instincts as normal parts of our human development and soul development, rather than forfeit these natural experiences and identity, but rather to nourish ourselves and each other by enriching our "church." To respect a man's church and union with God, and to respect a woman's church and union with God. Though one may be masculine and the other more feminine, we can have abundance and share, as "whole" humans together.

I believe this is a part of our revelation and prophecy, that we have now seen very deeply into our society, the troubles and harms, and with all of our learnings and developments, perhaps we can find those who share in our "union" sentiment, in order to fully heal.

And if we cannot find them, perhaps we can devote ourselves more to the creation of them. Less in the image of man or woman alone, more in the image of a more balanced God and Goddess. And we see this as the truth. A truth we should devote ourselves to in order to build more perfect, loving, harmonious families, and therefore communities and world.
