

It Is What We Hypothesized

Democrats are not understanding this concept, and it is a pretty simple concept. If you replace a natural demographic or population with another race, this is a form of genocide. Race replacement is holocaust.

It has become very clear that the economy means more to the Democratic Party than does the natural American population. Money valued over life? Is anyone surprised?

We could have strengthened Americans, supported Americans, and helped them build families and healthy homes. Instead, what happened? Americans have been beaten down, poisoned, and made to foot the bill for “new Americans” by the most disgusting and atrocious forms of fraud, theft and tax exploitation. It is just so disturbing.

My heart is broken for the American people and all that they have endured. I think of a gentleman I saw in Florida. He had labored all of his life, and he always paid his taxes. He more than likely voted Republican because he believed in the American dream and in supporting the American people. This is why he never took a free handout all of his life, because he truly cared about his country, he made this sacrifice for us.

He looked broken. And that is the truth. Democrats have broken this country. It is a party that I used to be a part of, but all that has changed, now I know what they are truly all about. I wish I had never, ever voted for a Democratic politician. Americans deserve so much better than this hell that has been created by the left extremists.

The left has created a war and wallowed in it too. Projecting hate and false propaganda to the stage of genocidal hate speech against their own people? Fauci is the tip of the iceberg of the deadly experiences Americans have faced. The data backs it up. We are missing Whites. The demographic shift is so tremendous that it can be seen all over the country. Where did they go?

Three Blind Mice, See How They Run. Running From Poison. Their Populationcide Is Not Done.

“What happened?” We asked. Our friends who worked on the casework side said, “We have the answers.” Interpreting the data felt like having our hearts shattered over and over again into a million pieces.

They confirmed it. It was deadly. That’s what happened. It was unnatural death to White Americans.

But it wasn’t just White Americans. Our home front had been sabotaged, brutalized and slaughtered by both domestic and foreign enemies. These same enemies the left hoists up as high as the American flag, used to be. Here you go, Americans. Democrats want you to know who your new replacement is. They’re out on the streets waving black flags and shouting, “Death to Christians. Death to Americans.”

Nice people. I am all set. Forced diversification, instrumental migration, it's all a war crime. You can try. But at this stage (New Sov) I'm falling in line.
