

ADL

“It was formed in 1913 following the lynching of Leo Frank in Georgia, and in the years since, it has advocated for civil rights. The ADL continues to fight against American antisemitism and all forms of extremism, keeping tabs on acts of white supremacy throughout the US.”

“In its early decades, the ADL benefited from being among the few highly centralized Jewish community relations organizations alongside the American Jewish Committee and American Jewish Congress. This characteristic gave these three organizations greater influence on the national Jewish community at a time when most local congregations and organizations were splintered, with little outreach to the broader community.”

“The President & Chief Executive Officer at ADL Inc. earns an average of \$763,026 per year.”

The ADL has benefited Jewish people as an organization that actively works to protect Jews. They also advocate on behalf of Black people and immigrants in their fight. They were founded by immigrants to America. They have made substantial profit from donations.

ADL has contributed to many good things in the US. However, my question is; Have they done any advocacy for White Americans, specifically the White native population of America?

If an “American White” identity group was formed, similar to their Jewish identity group, would they “keep tabs on them?” My concern is unchecked (Israeli, Russian & Jewish) surveillance and spying on American Whites and Americans, as well as a lack of advocacy for American Whites, and “deficient humanity” toward the White class of people.

I also have concerns about “Jewish supremacy,” where there is a “cost-benefit” to removing “power” from Native Americans and White Americans while simultaneously working to support, advocate and protect themselves. While I understand the ADL does many good things, I fear the “power” of organizations that may actively target and vilify the “White” race, while not holding others accountable.
