

The Truth Is Ugly

The "Welcoming America" initiative doubled the American homeless population in some cities, while foreigners are fighting those who are trying to build homes and apartment buildings with lawsuits. It isn't by mistake. Mass instrumental migration. The cases show that many are simply not seeking American workers first, as required by law. They prefer to exploit laborers and don't want to pay minimum wage.

Furthermore, crime has doubled in some places, and the crime and census data was falsified by activists. So much harm has been perpetuated against the Natives. Once those markers hit 20% foreign population, the harms multiply. Currently, our population is 27% immigrants, altering the demographics and culture in many states. It's a crime against humanity.

While many immigrants are a positive addition, population replacement is genocide, plain and simple, and it isn't kind. It is combined with modern forms of war, relentless targeting, human slavery, trafficking, and fatal drugs: a 437% increase in fake opioids that contain deadly fentanyl.

The Chinese cartel came in and poisoned the medical marijuana industry. Vapes contained over 745 times the toxic dose of the pesticide fipronil, which is fatal when ingested. It may as well have been Zyklon B.

BLM, Hispanic Federation, Jewish Federation, Antifa, Bolsheviks, arsonists, and others caused more harm and damage to the US than ever before in US history. Racism, race targeting, and slavery are thriving. 50,000 women and children are enslaved each year in the US. Whites are often targeted, with 86% of revenge pornography victims.

The news lies, mostly owned by the Left, foreign and Jewish political Bunds. The American people have been treated terribly! The cartel is 150,000 to 180,000 strong, with many associates in the USA. Over 50 Mexican politicians had their visas revoked for supporting the cartel.

It's WW3, and the truth is not being told. Of course it's not. It's mass instrumental migration, and its aim is to reduce our population and replace it. That's war.

We are proud of the American military, and proud of all Americans who have remained firm in who they are, what their culture means to them, and the values and virtues we hold. We do not accept open borders, any abolish campaigns, cultural or population replacement.

The truth is ugly.
