Mexican street art is alive.

New anamorphic mural developed at [@upartstudio](#) during the great [@bigwallsbigdreams](#) festival in Houston, US.

Thanks for the hospitality and great moments in sharing with great artists and new friends from all over the world! Let's do another one!

Fellow American

They want to scare you "just a little bit."

It is not "activism," nor is it "art." It is *cold warfare*. Whether cultural, expressed in a certain region, or normalized, pressuring Americans to accept this culture is coercion and force. It also constitutes fraud, where it is presented as "activism" or "liberation," while cartels mass-kidnap children and display this same "art." It is used as a *form of intimidation*, or scare tactic, while *crimes against humanity* are committed. When questioned, Americans are titled, "racists," representing "blame-shift" politics. **Refuse cold war art.**
